

ORACLE®

Licensing Metric Model & Concept

Arief Gunawan

Oracle Technology Department

PT. Mitra Integrasi Informatika

What is a License?

- A license is the “ **Right To Use** ” (RTU) the software and not the software itself. If you have a license, you can obtain a copy of the software through whatever means - order, download, use the CDs from your last project, etc.
- Licenses are not tied to the product version. For example, an Enterprise Edition database license is equally valid for Oracle 9i, Oracle 10g or Oracle 11g. However, you are only entitled to new versions if you have a valid maintenance and support contract in place.

Oracle License and Support Compliance

Some possibilities related to license compliance cases are:

- More users than what are licensed.
- More CPU's than what are licensed.
- Mixed support: licenses with active support and others where support has not been paid for.
- Using options such as the Tuning and Diagnostics Packs that are part of GRID Control, which is free, but need a separate license. Same goes for Partitioning and RAC (except for in SE) it is an extra cost.
- Customizing and modification of E-Business Suite components may necessitate full use Oracle Application Server and Database licenses.
- Stand-by and Back up servers.
- Old license metrics that do not account for new business realities.

2 Types of License Tech. Metrics

- ✓ **Named User Plus**
- ✓ **Processor**

License Definitions and Rules

Named User Plus / Named User: is defined as an individual authorized by you to use the programs which are installed on a single server or multiple servers, regardless of whether the individual is actively using the programs at any given time. All of the remaining provisions of this definition apply only with respect to Named User Plus licenses, and not to Named User licenses. A non human operated device will be counted as a named user plus in addition to all individuals authorized to use the programs, if such devices can access the programs. If multiplexing hardware or software (e.g., a TP monitor or a web server product) is used, this number must be measured at the multiplexing front end. Automated batching of data from computer to computer is permitted.

Processor: shall be defined as all processors where the Oracle programs are installed and/or running. Programs licensed on a processor basis may be accessed by your internal users (including agents and contractors) and by your third party users. The number of required licenses shall be determined by multiplying the total number of cores of the processor by a core processor licensing factor specified on the Oracle Processor Core Factor Table which can be accessed at <http://oracle.com/contracts>. All cores on all multicore chips for each licensed program are to be aggregated before multiplying by the appropriate core processor licensing factor and all fractions of a number are to be rounded up to the next whole number. When licensing Oracle programs with Standard Edition One or Standard Edition in the product name (with the exception of Java SE Support, Java SE Advanced, and Java SE Suite), a processor is counted equivalent to an occupied socket; however, in the case of multi-chip modules, each chip in the multi-chip module is counted as one occupied socket.

Old Tech Metric - Concurrent Users

- Based on peak number or group of Users who have accessing the Database at the same time

Old License Metric

Do Oracle will recognize Old License Metric
such as CONCURRENT USER DEVICES ?

Named User Plus metric

- Based on (**Actual**) Users accessing the Database

Human & Non Human

ORACLE®

LICENSE COMPLIANCE – MULTIPLEXING ENVIRONMENT

MULTIPLEXING ENVIRONMENT

a large number of end users access a system via a middleware layer, so that the apparent number of users accessing the system is much smaller than the actual number of users

If multiplexing hardware or software (such as; web server product) is used, the number of Named Users must be measured at the multiplexing front end

Oracle Licensing Basic Tutorial

New to Oracle software licensing? Here's our guide with some of the basics on Oracle licensing.

It is to be noted that Oracle licensing policies change often so information here is also subject to change. Please come back and check for new and up to date information. Also, Oracle licensing beyond basics can be complex and difficult, the information here does not cover it all. This tutorial is written to explain in an easy way what Oracle licensing is about.

[License Metric](#)

Named User Plus

When licensing on the basis of Named User Plus you have to count people that are able to use the software at any time. Don't count pc's, count people. Don't count concurrent, count people. Don't count connections to a database, count people at the frontend.

processors. You have to make a distinction here between Oracle product that have 'Standard (One)' in the product name or not (i.e. Enterprise). When you want to license a 'Standard' product a Processor license a processor is counted as an 'occupied socket' (socket= is a cpu slot). In conclusion. When you want to buy a Processor license(s) for a product you check the product name: does it carry 'Standard (One)' in it's product name count occupied socket. The occupied (in use) sockets are the number of Processor license you have to buy. Does the product name carry 'Enterprise' you must count processors which are the required Processor licenses you have to buy. Additionally, the Processor license for Enterprise Edition products requires that you take into account the number of cores. This topic of multi-core processor licensing we will describe little later.

Database Metric ~ Named User Plus Guide

- For **countable** users only
- Everyone and everything (non-human devices) accessing (direct & indirect) the program must be licensed
- Minimum
 - Standard Edition 2 : 10 Named User per Server
 - Enterprise Edition : 25 Named User per Processor / Core
- If the user is access multiple box, then the minimum must be met on each box

Processor Metric

- Based on Hardware

Database Metric ~ Processor Guide

- For **uncountable** population (Unlimited user)
- If list price for Processor cheaper than list price for Named User Plus
- Cost Price for **1 Processor = 50 Named Users**
- Minimum : 1 Processor per server

MULTICORE PRICING

Oracle Multi-Core Licensing

- Apply only to Enterprise Edition
- For SE calculate only physical Processor not the core
- The calculation:
 - Number of Processors x Core x N-factor
- N-factor:
 - Sun T1 = 0.25
 - Intel / AMD = 0.5
 - Other = 0.75
- Example – 2 Processors Dual Core, Intel
 - $2 \times 2 \times 0.5 = 2$ Processor License
 - All fractions of a number are to be rounded up to the next whole number

Example Multicore Pricing for DB EE

Mapping to NUP metric

6 Proc / Server = Enterprise Edition

License: 500 User

CPU Licensed: $6 \text{ Proc} \times 4 \text{ Core} \times 0.5 = 12 \text{ Processor}$

Minimal Licensed: $12 \text{ Proc} = 12 \times 25 \text{ User} = 300 \text{ User}$

For EE Minimum licensing : 25 User per Processor

Actual User (NUP) should be licensed = 500 User (whichever greater)

Oracle Processor Core Factor Table

Vendor and Processor	Core Processor Licensing Factor
Sun and Fujitsu UltraSPARC T1 processor (1.0 or 1.2 GHz) Only named servers including: Sun Fire T1000 Server, SPARC Enterprise T1000 Server*, with 6 or 8-core 1.0 GHz UltraSPARC T1 processor Sun Fire T2000 Server, SPARC Enterprise T2000 Server*, with 4, 6, or 8-core 1.0 GHz, or 8 core 1.2 GHz UltraSPARC T1 processor	0.25
Sun Netra T2000, 1.0 or 1.2 GHz UltraSPARC T1 processor	0.25
SPARC T3 processor	0.25
Sun and Fujitsu UltraSPARC T1 1.4 GHz Only named servers including: Sun Fire T2000 Server and SPARC Enterprise T2000 Server*, with 8-core, 1.4 GHz UltraSPARC T1 processor	0.5
Sun T6300, 1.4 GHz UltraSPARC T1 processor	0.5
AMD Opteron Models 13XX, 23XX, 24XX, 32XX, 41XX, 42XX, 61XX, 62XX, 83XX, 84XX or earlier Multicore chips	0.5
Intel Xeon Series 56XX, Series 65XX, Series 75XX, Series E7-28XX, Series E7-48XX, Series E7-88XX or earlier Multicore chips	0.5
Intel Itanium Series 93XX or earlier Multicore chips <i>(For servers purchased prior to Dec 1st, 2010)</i>	0.5
Intel or AMD Desktop, Laptop/Notebook, or Netbook Multicore chips	0.5
Sun UltraSPARC T2+	0.5
SPARC64 VII+	0.5
SPARC T4 processor	0.5

Sun and Fujitsu SPARC64 VI, VII	0.75
Sun UltraSPARC IV, IV+, or earlier Multicore chips	0.75
Sun UltraSPARC T2	0.75
HP PA-RISC	0.75
IBM POWER5+ or earlier Multicore chips	0.75
All Single Core Chips	1.0
Intel Itanium Series 93XX <i>(For servers purchased on or after Dec 1st, 2010)</i>	1.0
IBM POWER6	1.0
IBM POWER7	1.0
IBM System z (z10 and earlier)	1.0
All Other Multicore chips	1.0

* SPARC Enterprise T1000 and SPARC Enterprise T2000 Servers may be sold and branded by Oracle, Sun Microsystems, Fujitsu or Fujitsu Siemens.

Statement of Change:

On 09/01/2009, clarified that the "AMD Third Generation Opteron or earlier Multicore chips" are "AMD Opteron Models 13XX, 23XX, 24XX, 83XX, 84XX or earlier Multicore chips"

On 09/24/2009, changed the Core Processor Licensing Factor for Sun UltraSPARC T2+ from 0.75 to 0.50

On 02/16/2010, added new Intel Itanium chip 93XX to 0.5 core factor category. Also added IBM POWER7 chip to core factor 1 category

On 04/08/2010, added new Intel Xeon chips (Nehalem EX, Series 75XX and Westmere EP, Series 56XX) and new AMD Opteron chip (Series 61XX) with a core factor of 0.5

On 07/19/2010, added Intel Xeon chip (Nehalem EX, Series 65XX) and AMD Opteron chip (Series 41XX) with a core factor of 0.5

On 10/05/2010, added SPARC T3 chip with a core factor of 0.25

On 12/01/2010, changed the Core Processor Licensing Factor for Intel Itanium Series 93XX from 0.5 to 1.0. Also added notes in parenthesis to the affected rows in the table above

On 12/02/2010, added SPARC64 VII+ chip with a core factor of 0.5

On 06/03/2011, added Intel Xeon Series E7-28XX, Series E7-48XX, and Series E7-88XX chips with a core factor of 0.5

On 09/06/2011, added SPARC T4 chip with a core factor of 0.5

On 12/08/2011, added AMD Opteron Chip Models: 32XX, 42XX, and 62XX with a core factor of 0.5

Database Licensing Environment Concepts

- ☐ Production & Test
- ☐ Backup / Failover / Standby
- ☐ Batching / Export Import
- ☐ Partitioning

Licensing Environment

ENVIRONMENT	NOTES	NEED LICENSE
• Production • Test • Backup • Failover • Standby • Batching (by DBA) • Export/Import	• <i>Business purposes</i> • <i>Test/Dev purposes</i> • <i>Backup to Tape</i> • <i>HA by Cluster</i> • <i>Hot/Online Backup</i> • <i>Batch processing</i> • <i>Backup Flat file</i>	• Full License • Full License • No License • 10 days spare / Full License • Full License • Full License • Full License

PARTITIONING

- Oracle only recognizes **HARDWARE** partitioning as means to install and license Oracle on fewer than the total number of processors

Licensing Environment

ENVIRONMENT	NOTES	NEED LICENSE
• Hardware Partitioning	<i>Physically segment a large server into small system</i> e.g - Dynamic System Domain (DSD) - Dynamic Reconfig (DR) - LPAR (adds DLPAR with AIX 5.2) - Static Hard partitioning - Solaris 10 Containers - Oracle VM	• Permitted
• Software Partitioning	<i>Segment O/S using O/S resources to limit # of CPU used by Oracle</i> e.g - AIX Workload Manager - HP Resource manager - Processor sets & Solaris 9 Resource Containers - Affinity Management - VMWare	• NOT Permitted

Example - Soft Partitioning

Because it will determine how many Oracle Technology Licenses that the customer need to purchase to avoid being in under licenses or uncomplying Oracle license situation.

o Example

Database Licensing Formula

Software License

- Edition ?
- Named-User License ?
- Processor License ?

**Standard
Product
Support (SPS)**

**Annual
Technical
Support (ATS)**

22 % from License
Mandatory for 1st Year !

Standard Product Support (SPS)

Software Update License & Support

- Free Program Updates / CD Upgrade
- Software Transfer License Policy / Transfer Right
- Telephone Technical Assistance / Hotline Support 24x7
- On-line Access to Oracle Metalink (MOS) / Web-Support (iTAR)
- Free Subscription to Oracle Magazine, Support Notes, Support News via OracleMetalink.
