EMAIL Alert sent:

Dear Customer,

Service Request SR [4-0002135490](#) has been updated and requires your attention.

- SR Issue Type: General Guidance
- SR Status: Customer Working
- SR Product: Oracle APEX

Please click the SR link to review and update it as needed at your earliest convenience.

Message from Oracle - Action Plan

Feb 25, 2026 1:17 AM

For a DB 19c or 23ai, the APEX version recommended would be 24.2.X

You can get APEX software at: <https://www.oracle.com/tools/downloads/apex-downloads/>

Please confirm we have answered your questions and if closure of this Q/A SR is appropriated.

Hi Chandra,

Thanks for your update.

What is the database version you are using ? So, that we can suggest the compatible version of APEX can be installed in the database.

Answer: We use Database 23C free for satellite apps, and we use DB 19C in our Oracle EBS Applications

Regards,
Iwan

Hi Iwan Herdian ,

APEX installs as a schema in Oracle Database. It requires an Oracle Database to run. You can install and use APEX:

- 1.On-premises with your own Oracle Database installation
- 2.In the cloud with Oracle Cloud services
- 3.With Oracle Database Free (formerly XE / free tier)
- 4.With any paid Oracle Database edition (SE, EE, Autonomous, etc.)

APEX itself does not include a standalone database engine — it's a development platform that runs inside an Oracle database. You must have a database to use it in production. APEX can run on Oracle Database Free

Oracle APEX is included at no extra cost with the Oracle Database Free edition (or Oracle XE). That means:

APEX is free to install on Oracle Database Free

You can build and host production apps if you comply with database limits

There is no separate APEX license fee.

What is the database version you are using ? So, that we can suggest the compatible version of APEX can be installed in the database.

Regards,
Chandra

Hello,

Thank you for using My Oracle Support.

My name is Chandra, and this Service Request (SR) has been assigned to me from the APEX Support Team. I will be assisting you with your request.

For guidance on how to work effectively with Oracle Support, please refer to the following note:

Note 166650.1: Working Effectively With Global Customer Support

We are currently reviewing and researching the issue, and we will update the SR or contact you as soon as we have relevant information.

Thank you for your patience.

Best regards,
Chandra Bijivemula
